**Subject:** Items from Call

OEJTIA circled back with Wilma Subra (LEAN) regarding concerns she mentioned on the EJ Network call 9-5-17. She noted the lack of response and support from agencies regarding communities negatively impacted by the storm in Louisiana areas. Coastal Parishes mostly affected by Harvey are: Cameron, Vermillion and Iberia.

#### Concerns

- Sabine Diversion Canal – noted the need for agencies to look at the quality of water. Who is monitoring the water that is being pumped into the Canal and then distributed to drinking water sources?
- Cameron/Vermilion Parishes – there is a real problem with sediment sludge and a need to sample for contaminant sources. People are walking and possibly ingesting harmful contaminants.
- Vietnamese Fisher Community in Iberia Parish were severely impacted by Harvey. What agencies are looking into their concerns?
- Vinton Parish was really impacted by flooding. What agencies are looking into their concerns?
- Concerned about venting and flaring from facilities in Calcasieu Parishes. OEJTIA requested that she submit a listing of those facilities along with complaints to R6.
- Concerned that LDEQ doesn't have data reported from facilities on their EDMS database.
